## About the British Council Korea

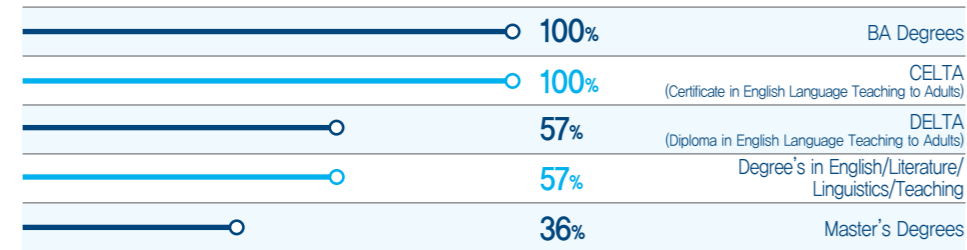

The British Council is the UK's international organisation for educational opportunities and cultural relations. We create international opportunities for the people of the UK and other countries and build trust between them worldwide. We have a long history in Korea, having established our presence here in August 1973.

Teaching English is a large part of what we do, whether you want to study at university, improve your career prospects in a global economy, or simply enhance your English communication skills, studying with the British Council puts you on a fast track to success.

All of our courses consist of 100% face to face lessons and are taught by our internationally qualified teachers with native speaker proficiency.

## Our Teaching impact

The British Council employs only established English language teaching professionals that have been certified by the University of Cambridge. All our teachers are native English speakers. The experience and qualifications of our teachers ensure that they provide each student with a bespoke learning solution in line with our teaching methods. Our teachers are committed to professional development. Many have taken further courses to allow them to specialise in particular types of teaching, ranging from business English to young learners. The British Council's global framework supports our teachers to deliver a quality language learning experience, both inside and outside the classroom.

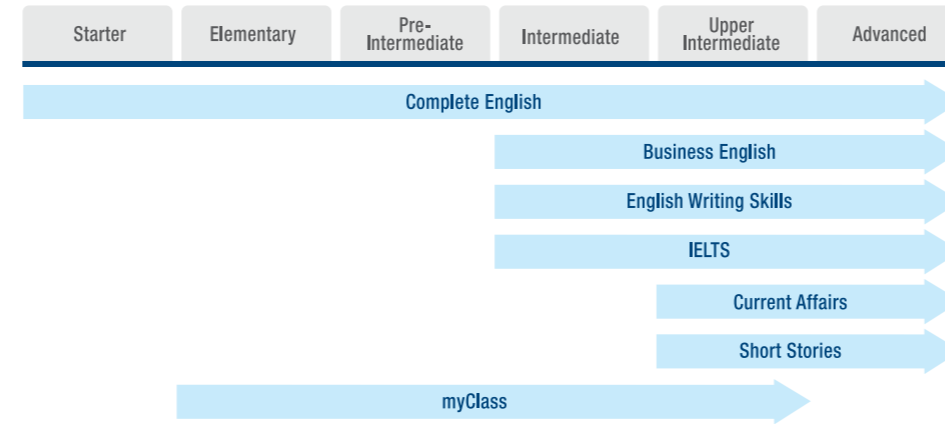

## Our teaching methods

Engaging, interactive and communicative teaching methods play an essential part in all our classes. We know from experience that this is the only way to prepare our students to communicate effectively in English in the world today.

To help our students best achieve their learning goals, our teachers use a variety of proven teaching methods, in conjunction with the most up-to-date teaching materials and cutting-edge learning technologies.

Our teachers work hard to ensure that all students get the individual attention they need. A sense of progress is also vital, so teachers provide regular personal feedback to students on how they are doing.
